

IMPROVING INDOOR AIR QUALITY

Are members of your family more susceptible to allergies or viruses in your home?

Have you noticed odors from pets, cooking or from your air conditioning system?

Are you tired of seeing sunbeams or tiny floating particles in the room?

Are static electricity shocks an issue in your home?

The Center for Disease and Control (CDC) is responding to an outbreak of respiratory disease caused by a novel (new) coronavirus that was first detected in China and which has now been detected in 60 locations internationally, including in the United States. The disease it causes has been named "coronavirus disease 2019" ("COVID-19"). At this time COVID-19 virus has not been made available for testing. However, the iWave family of products have been proven through independent lab testing to significantly reduce a wide variety of pathogens and viruses similar to coronavirus in the breathing zone and on hard non-porous surfaces. It is important to note that we make no medical claims.
